## CLASSIFICATION:

The results of this bull evaluation should in no way be used as a legal document certifying or condemning fertility. Rather it is an evaluation guide to utilize the knowledge we currently have to discourage use of potentially inefficient sires. To the best of my knowledge the results of this evaluation indicate that the potential breeding capacity of this bull is:

**SATISFACTORY**

Expected Progeny Differences can only be directly compared to other EPDs calculated in the same analysis. Results from different analyses are likely based upon different datasets and different underlying parameters and trait definitions.

Information contained on this web database, including but not limited to pedigree, DNA information, Expected Progeny Differences (EPDs) and Index values, is based on data received from the society/association database which was supplied by members and/or third parties. Every effort is made to ensure the accuracy of the information, the ABRI, the society/association and its officers and employees assume no responsibility for its content, use or interpretation. Information submitted to the database may have errors in it which can not be detected by current technology. For this reason, users ought to consider if they need to obtain independent test results on the relevant animal (if possible) to ensure the data is accurate.
